**RE: Well Water Sampling Event –
Laboratory Test Results**

Dear Lawrence and Collete Gernon:

On behalf of Wood River Pipe Lines LLC (Wood River), Antea®Group would like to thank for your cooperation in allowing Antea Group to collect water samples from the water supply well at your residence. The water samples were collected in response to the pipeline spill site near Route 113, Kankakee, Illinois in order to confirm that petroleum products have not impacted your well water. A sample was collected from the well located on your property on March 31, 2014.

Enclosed for your information are the test results from your well water. We are pleased to report that no benzene, toluene, ethylbenzene or xylenes (collectively, BTEX) or other common petroleum constituents were found in your well water and that the test results meet Illinois Environmental Protection Agency (IEPA) Class I Groundwater Standards for drinking water.

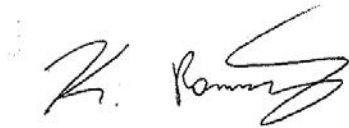

The presence of chloroform in your well is not associated with petroleum products. However, the chloroform concentration is above the IEPA drinking water standard. Shortly, the Illinois Department of Public Health (IDPH) will send you a letter providing toxicological interpretation of your well sampling results, in order to explain whether or not there might be any health implications from these results and provide any recommendations for further testing of your water well.

If you desire further explanation of these results, or if you have additional questions regarding the water testing procedures, please contact Dr. Tom Baughman at the Illinois Department of Public Health at (630) 293-6800 or Mike Norris, Wood River District Right-of-Way Agent at (219) 313-5321. With your permission, we may periodically request to re-sample your well in the future. We thank you for your participation in the well water sampling program.

If you would prefer results being sent to you via email versus Fed Ex, please contact Beth Helgeson of Antea Group at (800) 477-7411.

Sincerely,

A handwritten signature in black ink, appearing to read "K. Rannaoja", with a stylized flourish at the end.

Analytical Notes:

These compounds represent eight (8) of the most common petroleum product constituents. For the full list of compounds that were analyzed, please consult the attached laboratory data package.

VOC = Volatile Organic Compounds

IEPA = Illinois Environmental Protection Agency

Groundwater Quality Standards for Class I: Potable Resource Groundwater

USEPA = United States Environmental Protection Agency

MCL = Maximum Contaminant Level

ug/l= micrograms per liter

< = Not detected at or above indicated laboratory reporting limit

NGV = No given value

NA = Not Analyzed

Results in bold exceed applicable action limits

Date Received: March 31, 2014

Dear Mr. Kendall Rannaoja:

The above referenced project was analyzed as directed on the enclosed chain of custody record.

All Quality Control criteria as outlined in the methods and current IL ELAP/NELAP have been met unless otherwise noted. QA/QC documentation and raw data will remain on file for future reference. Our accreditation number is 100292 and our current certificate is number 003363: effective 02/18/2014 through 02/28/2015.

I thank you for the opportunity to be of service to you and look forward to working with you again in the future. Should you have any questions regarding any of the enclosed analytical data or need additional information, please contact me at (630) 778-1200.

Sincerely,

Stan Zaworski
Project Manager

Case Narrative

ANTEA USA

Lab File ID: **14-1527**

Project ID: **Illinois Route 113 Release**

Date Received: **March 31, 2014**

All quality control criteria, as outlined in the methods, have been met except as noted below or on the following analytical report.

The results in this report apply to the samples in the following table:

Laboratory Sample ID	Client Sample Identifier	Date/Time Collected
14-1527-005		03/31/14 11:27

Sample Batch Comments:

Sample acceptance criteria were met.

The following is a definition of flags that may be used in this report:

Flag	Description	Flag	Description
<	Analyte not detected at or above the reporting limit.	L	LCS recovery outside control limits.
C	Sample received in an improper container for this test.	M	MS recovery outside control limits; LCS acceptable.
D	Surrogates diluted out; recovery not available.	N	Analyte is not part of our NELAC accreditation.
E	Estimated result; concentration exceeds calib range.	P	Chemical preservation pH adjusted in lab.
G	Surrogate recovery outside control limits.	Q	Result was determined by a GC/MS database search.
H	Analysis or extraction holding time exceeded.	S	Analysis was subcontracted to another laboratory.
J	Estimated result; concentration is less than routine RL but greater than MDL.	W	Reporting limit elevated due to sample matrix.
RL	Routine Reporting Limit (Lowest amount that can be detected when routine weights/volumes are used without dilution.)	ND	Analyte was not detected using a library search routine; No calibration standard was analyzed.
